

Katika Art

Kokoro

Hi, my dear friend! It is my crochet pattern. My goal is to make it easy to understand. It contains photos of my work process as well as international symbols of crochet stitches. Since my art utilizes freeform crochet techniques, it is the only comprehensible way to break this kind of piece into a pattern. I hope you find this pattern helpful and easy to follow.

I'd like to give you several tips on doing a crochet art piece like mine:

1. Work with hooks and yarn you are comfortable with. If you don't work with #2 hooks, just pick the one you like and yarn which will be fit for it.
2. Pay attention to shapes the image consists of and try to recreate them. Your work process doesn't have to be exactly like mine. If you feel like you should add a stitch somewhere to create the ideal shape for the rose, do it.
3. Experiment with colors! If you don't have the same colors I have, try combining ones at your disposal.
4. Don't be sad if something isn't working out and don't hurry do unravel the piece and redoing it. Try adding stitches, experimenting with shapes and color before you start over, in short, use any opportunity for new experience in crochet art, as experience is the best teacher here.

I used black to show which way every row goes and what kinds of crochet stitches go into it. Blue is used for the number of the skein that is being used. Also, don't forget to iron your piece so it doesn't wrinkle. Email me your pieces to katika@katika-art.com, if you want to share, I will really appreciate it! Good luck with your art!

With love,

Katika
